

Easysteer™

PBS Payloader Offering Huge Payload Increases for General Access Unit

**Suitable for many trailer types.
Similar payload of a quad without the extra axle.
Simple self steering suspension dramatically reducing tyre scrub.**

High accuracy loadcell weighing system to maximise this payload advantage.

This unit can achieve a similar payload to a quad axle trailer with one less axle.

**Suitable for many different uses including but not limited to:
Log trailers, pole trailers, flatbeds, bulk tankers, side tipping trailers**
