

# Elphinstone Road Railer

Revolutionary Logging Frames For Rail Wagons And Skeletal Trailers Alike

**Connect to standard container rail wagons by twist locks.  
Easy maneuvering of frames by fork pockets.  
Manual hydraulic raise / lower bolster assemblies.**

Bolster assemblies raised

Bolster assemblies lowered

Bolster assemblies feature a manually operated hydraulic pump for raising and lowering the bolsters.

Road Railers can be stacked up to 6 high when the bolsters are lowered, or can have a standard 20 ft container affixed to the top.

# Elphinstone Road Railer

One Design, Multiple Configurations

Manual load binder winches

Twist lock corner mounts

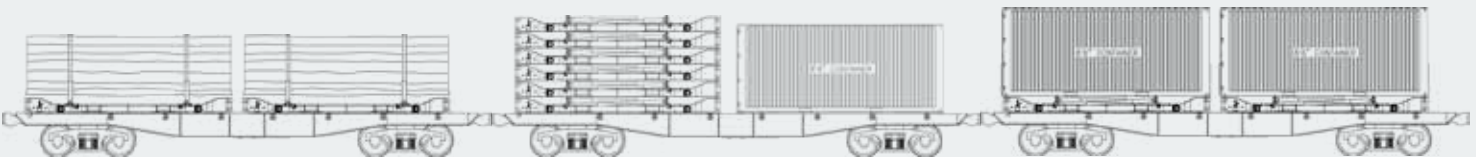

Portable via forklift

Optional bolster widening extensions

**Road Railer is a versatile and cost effective solution to the log transport industry whether by road or by rail.**

Primary purpose: Carting 6m logs per Road Railer frame or 12m logs across two frames

Stackable up to 6 high saving valuable space for other freight

Road Railer bolsters folded down allows two 20ft or one 40ft shipping container to be affixed on top of the frames

**Portability is maintained as Road Railer fits onto skeletal trailers.**

**Specifications subject to change without notice**
